The Rails Make the Difference

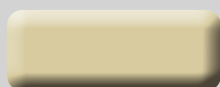

It is common for PVC privacy fence to utilize 5" square posts along with tongue and groove vertical pickets. However, the horizontal rails can make the difference between a weak and strong fence system.

Industry standard rails are 1.5" wide x 5.5" tall. The Hartford privacy fence, offered exclusively by Midwest Fence, uses 2" x 7" rails to provide superior strength and performance.

Available Colors

White

Tan
